

PostgreSQL Assignments:

1. How many payment transactions were greater than \$5.00?
2. How many actors have a first name that starts with the letter P?
3. How many unique districts are our customers from?
4. Retrieve the list of names for those distinct districts from the previous question.
5. How many films have the word Truman somewhere in the title?
6. Create a table to organize our potential leads! We will have the following information:
A customer's first name, last name, email, sign-up date, and number of minutes spent on the dvd rental site. You should also have some sort of id tracker for them. You have free reign on how you want to create this table.

NB: Send your answer (SQL code) in Microsoft word to quantumassignment@gmail.com

Submission Instructions

1. Email address for submission:

To: quantumassignment@gmail.com
